# Digital Preservation

## A Not-at-all Random Walk Through the Digital Preservation Landscape

Digital preservation efforts such as Europeana or the Digital Public Library of America have been initiated to preserve our cultural heritage.

This talk will provide a motivation for different Web archiving efforts and discuss several preservation approaches developed by the Research Library of the Los Alamos National Laboratory. This overview includes Memento, a framework that makes it easy to access the Web of the past, Memento for Chrome, and SiteStory, a transactional archiving solution.

Let's talk time travel!

## 6. November 2013 um 17 Uhr

Exzellenzcluster Bild Wissen Gestaltung
